experience **Esto es**   **jun 2022 - now**

Frontend Developer for Esto es, we collectively lead the development of dynamic web applications using Next.js, React, Tailwind CSS, Material-UI. Managing multiple projects concurrently, our collaborative efforts with clients ensure the delivery of tailored solutions. Successfully optimizing web performance, developing e-commerce platforms, and bringing creative concepts to life through animated landing pages, we showcase a diverse skill set in frontend development.

Alkemy   **oct 2021 - nov 2021**

Frontend Developer for Alkemy, I collaborated with a talented group of developers to create a small-scale e-commerce platform using React.js. Contributing to the project's frontend development, I gained valuable experience in teamwork and React.js application development in a professional setting.

projects **Contact list**   **2022**

Engineered a feature-rich contact list application with user authentication using React.js, Material-UI, and Firebase. Implemented robust login and register logic to ensure secure access and personalized experiences. This project highlights my expertise in frontend development, user authentication, and database integration.

Trivia game   **2021**

Designed and developed an engaging trivia game featuring a points system, utilizing React.js and integrating an API for diverse question sets.

Superhero team   **2021**

Developed an innovative Superhero Searcher application using React.js, seamlessly integrating with an external API to fetch and display superhero information. The app features a personalized touch, allowing users to save their favorite superheroes to a team roster, a functionality facilitated by secure cookie storage.

education **English Language**   **2023 - now**

I have been actively enhancing my English language skills at the Liverpool Institute, starting at an intermediate II.

Computer Technician   **2015 - 2021**

Graduated as a Computer Technician from Escuela Enseñanza Técnica N°4. Tools and technologies included HTML, CSS, JavaScript, BDD, SQL, MySQL.

skills **Languages**

TypeScript, JavaScript, CSS.

Frameworks and libraries

React, Next.js, Tailwind, Firebase.

Tools

Jira, Bitbucket, Github.
